- Trucks and Caravans
- Boats
- Remote Infrastructure

Totally Wireless Video Security System

IP 65 Weatherproof
-20°+60°C

Motion Sensor

Night Vision camera

Infrared Illuminators

Motion activates the integrated Night Vision camera.

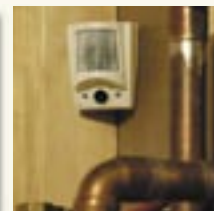

A 10 second video of the intruder is sent over the cell network to the monitoring station and then to the site manager

PORTABLE

AFFORDABLE

ANYWHERE

This means fewer false alarms, faster police response, and greater situational awareness for everybody involved.

Simple Installation

The system comes pre-programmed ready for immediate installation/use. Simply mount the cameras and other devices at the job site – typical install is less than one hour. The Video Verified Security System is easy to relocate from job site to job site.

Videofied also delivers privacy because the Night Vision cameras are only ON during an alarm. "Event based" video means greater security and faster police response for residential and commercial installations.

Video Verified Security System

Outdoor Camera
(P-Cam)

Indoor Camera
(P-Cam)

Keypad

Control Panel Communicator

GPRS SIM Card

The P-Cam

Self-Powered no A/C connection 2-way wireless transceiver. Up to 24 P-Cams per System

Self Powered
Integrated GPRS SIM card

Wireless GPRS Cell Option

The GPRS option enables the Videofied to report alarms and send video from any location with cell coverage. Security is no longer linked to A/C power or communication lines. This option is ideal in remote applications and those where phone or Ethernet are difficult or unreliable.

Additional Accessories Include

Keyfob Arming Device
Arming/Disarming Station

Keyfob Arming Device
