Plink Mobile App and Website Client Portal

Thankyou for choosing us as your Security Installation and Services Provider. The Plink mobile application available on both the Apple/Android platforms and the Website Client Portal allows you to view/edit all your alarm monitoring information such as users, zones, schedules, afterhours contacts and signal history from your mobile device or computer. You can receive Push notifications to your mobile from our control room operators for various alarm events such as "Late to Close" or "Unscheduled Opening" and then reply to add extra time to your closing schedule, request further action such as call the site, dispatch a patrol response or request no further action to be taken and arm the alarm system from within the App or Portal, the options are endless.

To get started, download the Plink App from your Platform below:

If you prefer to use your computer, go to our website and click the "Client Portal" Link to login:
